

NEUCOR LIGHTWEIGHT PRODUCTS

neucor™ currently manufactures lightweight MDF cores and panels for use in a multitude of interior applications including store fixtures, contract and residential furniture, walls and partitions, ceiling panels, acoustical panels, shelving, and cabinetry.

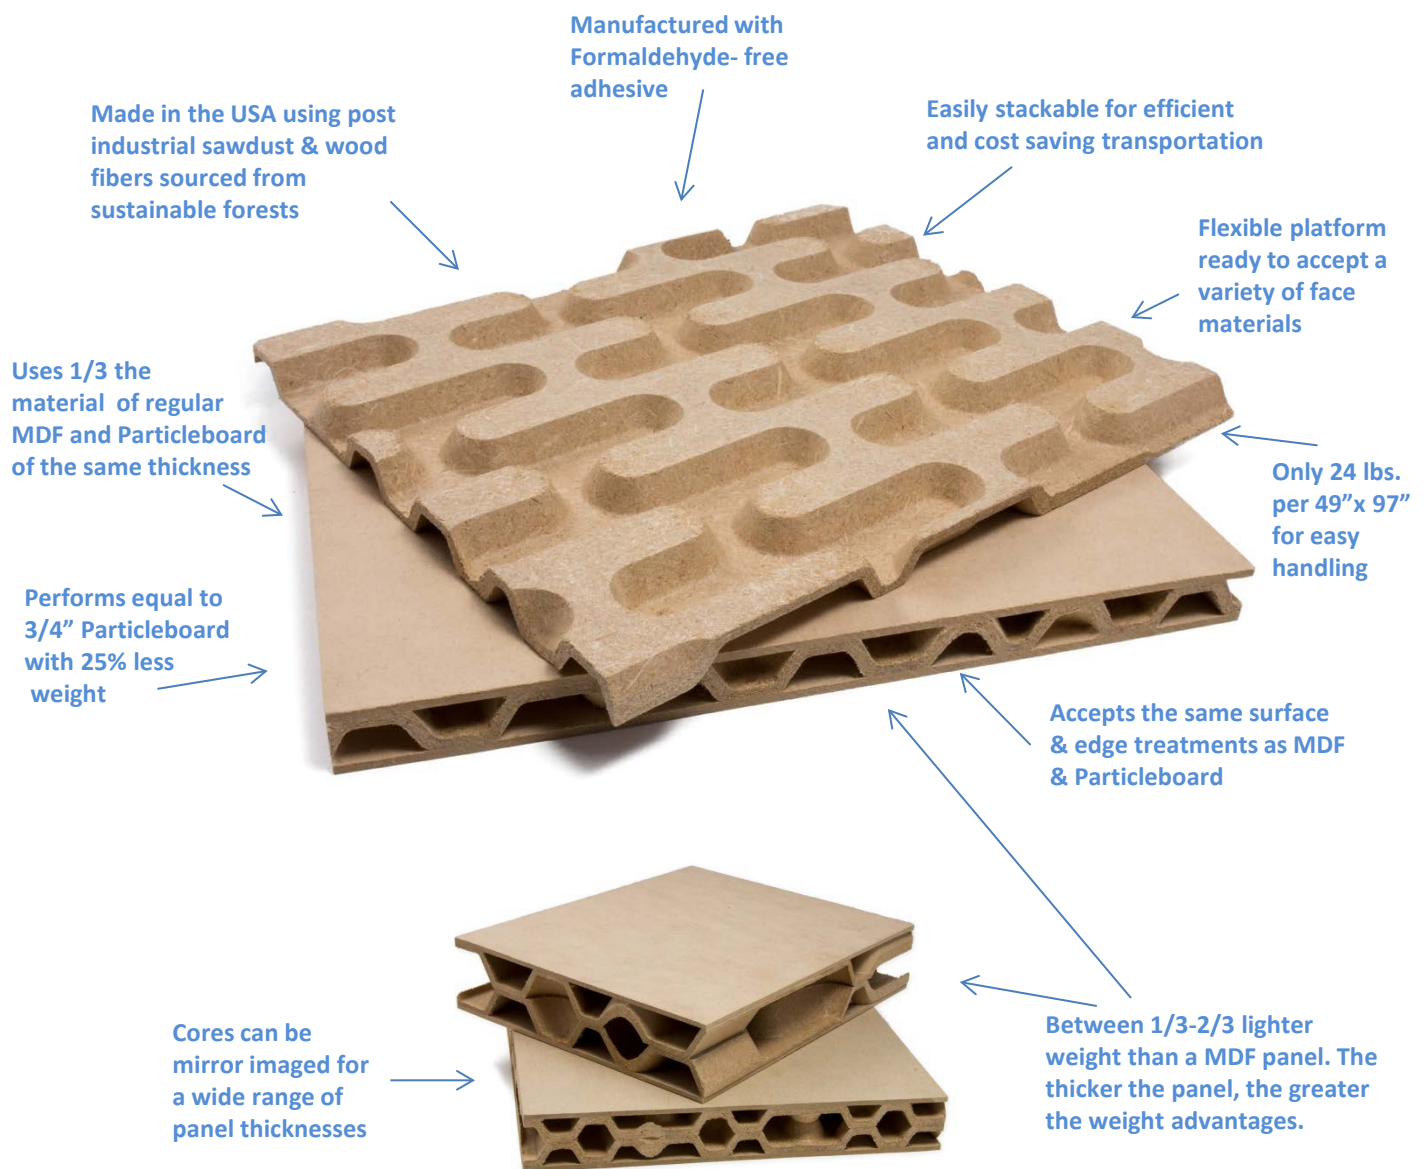

The Stacking of **neucor™** cores allows for panel thicknesses ranging from $\frac{3}{4}$ " to 3".

neucor™ cores create panels that are $\frac{1}{3}$ - $\frac{2}{3}$ lighter weight than traditional MDF products.

neucor™ panels come in standard sizes of 49" x 97" and 48" x 96".

neucor™ cores can be faced with MDF skin thicknesses ranging from 3mm ($\frac{1}{8}$ ") to 8mm.

Alternate wood or decorative face veneers can be used as well as unfinished MDF faces.

neucor™ cores and panels are CARB2 compliant.
NAF and FSC panels are available upon request.
